

Community/Board Operations

Pest Management/Pesticide Application

The Board of Education believes that structural and landscape pests can pose significant hazards to people, property and the environment. Pests are living organisms such as plants, animals or microorganisms that interfere with human uses for the school site. Strategies for managing pest populations will be influenced by the pest species and the degree to which that population poses a threat to people, property or the environment. Further, the Board also believes that pesticides can also pose hazards to people, property and the environment. The intent of this policy is to ensure the health and safety of students, teachers, staff and all others using district buildings and grounds.

The goal of this pest management program is to manage pests in order to:

- Reduce any potential human health hazard and/or to protect against a significant threat to public safety;
- Prevent loss or damage to school structures or property;
- Prevent pests from spreading in the community or to plant and animal populations beyond the site;
- Enhance the quality of life and to provide a safe and healthy learning environment for students, staff and others.

It is the policy of the Waterford Board of Education to implement an integrated pest management plan to reduce the amounts of pesticides applied in any building, or the grounds of any Waterford public school, by using all available pest control techniques including judicious use of pesticides, when warranted, to maintain a pest population at or below an acceptable level, while decreasing the use of pesticides.

The decision to apply pesticide in any building, or the grounds of any Waterford public school is dependent on results of periodic monitoring for pest populations to determine if a pest problem exists that exceeds acceptable threshold levels.

No application of pesticide shall be made in any building, or the grounds of any Waterford public school during regular school hours or during planned activities at any school except as provided by Connecticut statute or regulation.

Parents or guardians of children in any school and/or staff members in any school may register for prior notice of pesticide application at their school. Each school shall maintain a registry of persons requesting such notice, and shall provide notice to registered individuals in accordance with applicable Connecticut statutory and regulatory provisions.

Community/Board Operations

Pest Management/Pesticide Application (continued)

The Superintendent may direct that an emergency application of a lawn care pesticide be made without prior notice to parents or guardians of children in any school and/or staff members in the event of a threat to human health, subject to applicable Connecticut statutory and regulatory provisions.

The Superintendent may direct that an emergency application of a pesticide be made during regular school hours or during planned activities at school without prior notice to parents or guardians of children and/or staff members in any school in the event of an immediate threat to human health, subject to applicable Connecticut statutory and regulatory provisions.

There shall be no application of any lawn care pesticide on the grounds of any school with students in grade eight (8) or lower, except on an emergency basis, subject to applicable Connecticut statutory and regulatory provisions.
